

## **The C-Pods are here!**

The cPods (Collaboration-Pods), are designed to allow three students to work together on a project without having to crowd around a single monitor and keyboard on a laptop or computer station. This allows students to spread out while working together on a computer with three keyboards, three mice, and a 42 inch monitor.

There are 2 new cPods located on the main level of the Mortensen Library. Come check them out!
